The Reading 7-1 Practice Questions

English Reading · Level 7 · Units 1–8

Class _____ Name _____

• 10 questions for each unit · 5 choices · Choose one answer for each question.

Unit 1 · Art

[1–10] Read the passage and answer the questions.

Throughout time, art has been used to decorate homes, churches, and public buildings. In modern times, art is used in advertisements, magazines, cartoons, and even on television! Art in advertisements has become increasingly popular. This is called commercial art. One of the most famous commercial artists was Andy Warhol.

Andy Warhol was often sick as a child, so he spent a lot of time drawing. After college, he began his career making art for advertisements. His drawings of shoes became so well known that people wanted to see more of his work. Thus, in the 1950s, he began showing his popular works in art galleries. Warhol was one of the first artists to use silkscreen ink printing in his work. During the 1960s, he produced many famous art pieces depicting everyday objects. These include Coca-Cola bottles, dollar bills, and Campbell's Soup cans. This kind of art is referred to as "pop art."

Some critics think Andy Warhol was only interested in making money with his art. Others thought he was the perfect example of commercialized modern life. Apart from this argument, most critics agree that Warhol's work shows the changing value of art in everyday life.

Words: increasingly = more and more · advertisement = a picture or words that tell people to buy something · silkscreen ink printing = a way of printing pictures · depict = show, draw · critic = a person who gives opinions about art · commercialized = made to make money · argument = a disagreement

1. What does the underlined word decorate mean?

① make something bigger ② make something clean
③ make something look nicer ④ make something cheaper
⑤ make something quiet

2. What does the underlined word career mean?

① the job a person does for a long time ② the house a person lives in
③ the school a person goes to ④ the family a person has
⑤ the games a person plays

3. According to the passage, when did Warhol begin showing his works in art galleries?

① in the 1920s ② in the 1930s ③ in the 1940s ④ in the 1950s ⑤ in the 1960s

4. According to the passage, what was Warhol one of the first artists to use?

① oil paint ② silkscreen ink printing
③ photographs ④ computer pictures
⑤ colored pencils

5. What does the underlined word This refer to?

① art in churches ② art in public buildings
③ art on television ④ Andy Warhol's drawings
⑤ art used in advertisements

6. What does the underlined word Others refer to?

① other artists ② other critics
③ other advertisements ④ other art galleries
⑤ other everyday objects

7. Which is the correct order of (A), (B), and (C), from first to last?

> (A) People wanted to see more of Warhol's work.
> (B) Warhol was often sick and spent a lot of time drawing.
> (C) Warhol began his career making art for advertisements.

① (B) – (C) – (A) ② (A) – (B) – (C)
③ (A) – (C) – (B) ④ (B) – (A) – (C)
⑤ (C) – (A) – (B)

8. Which is **NOT** true according to the passage?

① Warhol was often sick as a child.
② Warhol made art for advertisements after college.
③ Warhol never used silkscreen ink printing.
④ Warhol showed his works in art galleries in the 1950s.
⑤ Most critics agree that Warhol's work shows the changing value of art.

9. What can we learn from the passage?

① Warhol never made money from his art.
② Warhol's art was shown only in art galleries.
③ People in the past did not use art to decorate buildings.
④ Warhol stopped drawing after college.
⑤ Critics do not all agree about why Warhol made his art.

10. What can we learn from the passage?

① Pop art used pictures of things people saw every day.
② Pop art was made only for advertisements.
③ Pop art showed mostly famous people.
④ Pop art was made before Warhol was born.
⑤ Pop art was shown only on television.

Unit 2 · Nature

[1–10] Read the passage and answer the questions.

The water cycle is necessary for life on Earth. Water on the ground evaporates into vapor and forms clouds in the sky. In return, rain brings water back down to the ground again, which ends up in streams, rivers, lakes, and oceans. What happens when humans tamper with the water cycle?

Most evaporation occurs in oceans as a result of the Sun's energy. This cools the temperature of Earth's climate and also affects the oceans' salt content. Having the correct amount of salt in the oceans maintains a delicate ecosystem of plants, fish, and other wildlife. One example of a disaster caused by tampering with the water cycle is the drying-up of the Aral Sea. The two rivers that fed the Aral Sea were diverted for farming in the desert. As a result, the sea is now almost completely dry, killing the wildlife that lived there and causing dust storms that affect human health.

As we can see, the water cycle is necessary to keep the environment balanced. It is important to understand the water cycle and to protect our water sources so they can function well for Earth's sake.

Words: evaporate = change into gas · vapor = water in the air · end up = finally arrive · tamper with = change something in a bad way · affect = change something · salt content = the amount of salt · maintain = keep · ecosystem = all the living things in a place · disaster = a very bad event · fed = brought water to · divert = make a river go a different way · dust storm = a strong wind full of dust · function = work · for Earth's sake = for the good of Earth

1. Which can best replace the underlined word occurs?

   ① stops ② happens ③ falls ④ ends ⑤ hides

2. Which can best replace the underlined word necessary?

   ① dangerous ② strange ③ slow ④ expensive ⑤ needed

3. According to the passage, what causes most evaporation in the oceans?

   ① the wind ② the Moon
   ③ the salt ④ the Sun's energy
   ⑤ the rain

4. According to the passage, where does rainwater end up?

   ① in the clouds ② in the desert
   ③ in streams, rivers, lakes, and oceans ④ in the Sun
   ⑤ in the air as vapor

5. Why does the writer mention dust storms?

   ① to explain how clouds are made
   ② to show how farmers water the desert
   ③ to describe the weather in the ocean
   ④ to show that the dry Aral Sea hurts people's health
   ⑤ to explain why the sea is salty

6. Why does the writer mention the salt in the oceans?

   ① to show that the right amount of salt keeps sea life healthy
   ② to explain why seawater tastes bad
   ③ to show how people make salt
   ④ to explain why fish die in rivers
   ⑤ to show how clouds get their water

7. Which is **NOT** true according to the passage?

   ① Water on the ground evaporates and forms clouds.
   ② Most evaporation happens because of the Sun's energy.
   ③ Two rivers used to flow into the Aral Sea.
   ④ The water cycle keeps the environment balanced.
   ⑤ The Aral Sea is now full of water again.

8. Which is true according to the passage?

   ① Rain never reaches the oceans.
   ② We should protect our water sources.
   ③ The Aral Sea dried up because of too much rain.
   ④ Dust storms help the wildlife near the Aral Sea.
   ⑤ The Sun has nothing to do with evaporation.

9. Complete the summary of the passage. Which words best fit (A) and (B)?

Water goes up into the sky as (A) _____ and comes back down as (B) _____.

① (A) rain ..... (B) vapor ② (A) snow ..... (B) clouds
③ (A) vapor ..... (B) rain ④ (A) vapor ..... (B) snow
⑤ (A) clouds ..... (B) salt

10. Complete the summary of the passage. Which words best fit (A) and (B)?

The water cycle is very (A) _____ for life on Earth, so we must (B) _____ our water sources.

① (A) important ..... (B) sell ② (A) dangerous ..... (B) protect
③ (A) dangerous ..... (B) forget ④ (A) important ..... (B) protect
⑤ (A) small ..... (B) use

Unit 3 · Social Studies

[1–10] Read the passage and answer the questions.

In the 1980s, people who protested the increasing trend of fast food started a “slow food” movement. The movement aimed to preserve local foods, recipes, and communities, while (a) _____ fast, commercialized foods. This inspired the “slow city movement.”

The first Slow City was Chianti, Italy. The people there wanted to keep nature in good shape and protect historic buildings. They came up with a plan for developing their town just the way they wanted. They called this plan cittaslow. The term comes from the words “slow” and “citta,” which means “town” or “city” in Italian. The founders of this plan decided that new developments should keep people healthy and promote good relationships among neighbors. They also thought development should not (b) _____ the natural environment.

Since 1999, dozens of cities around the world have been named Slow Cities. They have a lot of green places where people can exercise and enjoy nature. Slow Cities do not have many fast-food restaurants or big supermarkets. Instead, they have locally owned restaurants and small markets. Try visiting a Slow City someday to see if you like it!

Words: protest = say no to something · trend = what many people do · preserve = keep · commercialized = made to make money · inspire = give an idea · historic = old and important · come up with = think of · term = a word · founder = a person who starts something · promote = help something grow · dozens of = many · exercise = move your body to stay healthy · locally owned = owned by people in the town

1. According to the passage, when did the slow food movement start?

① in the 1950s ② in the 1960s ③ in the 1970s ④ in the 1980s ⑤ in the 1990s

2. According to the passage, what does “citta” mean in Italian?

① slow ② town or city ③ food ④ nature ⑤ plan

3. Which word best fits in blank (a)?

① buying ② cooking ③ selling ④ eating ⑤ rejecting

4. Which word best fits in blank (b)?

① hurt ② help ③ make ④ see ⑤ build

5. What is paragraph 2 mainly about?

① the history of fast food
② the foods of Chianti
③ the first Slow City and its plan, cittaslow
④ famous buildings in Italy
⑤ how to visit a Slow City

6. What is the best title for the passage?

① How to Cook Slow Food
② The Best Restaurants in Italy
③ Why Fast Food Is Popular
④ The History of Chianti
⑤ Slow Cities: Towns That Choose a Slow Life

7. Which is true according to the passage?

① Slow Cities have many big supermarkets.
② Slow Cities have many green places for people to enjoy nature.
③ The slow city movement started before the slow food movement.
④ People in Chianti wanted to build many new fast-food restaurants.
⑤ Only ten cities have become Slow Cities.

8. Which is **NOT** true according to the passage?

① People in Chianti wanted to protect historic buildings.
② Cittaslow was a plan for developing the town.
③ Slow Cities have locally owned restaurants.
④ New developments in Slow Cities should make people less healthy.
⑤ The slow food movement wanted to keep local foods and recipes.

9. Which idea would the writer most likely agree with?

① Life in a town can be good without fast food and big supermarkets.
② Every town should have more fast-food restaurants.
③ Old buildings should be replaced by big supermarkets.
④ Towns should grow as fast as possible.
⑤ People should not visit Slow Cities.

10. What can we learn from the passage?

① Slow Cities are found only in Italy.
② The idea of Slow Cities spread to many countries.
③ The slow city movement started in the 1950s.
④ Slow Cities do not allow any restaurants.
⑤ Chianti is the only Slow City in the world.

Unit 4 · Science

[1–10] Read the passage and answer the questions.

Before modern chemistry, ancient people tried to understand the makeup of the world. The ancient Greek philosopher Empedocles theorized that four elements made up every substance known to man. These elements were water, fire, earth, and air.

What observations did Empedocles make about these elements? First, he noted that pots were made with earth and water. After being mixed and shaped, they were burned with fire and cooled with air. All four elements were necessary to (a) _____. The same pot was used for cooking plants from the earth, often mixed with water, over a flame. The air cooled down the food so it could be eaten. Thus, all four elements were necessary to prepare a meal. Empedocles also believed that these elements were indestructible and unchangeable. His theories inspired later scientists to study more about the elements that make up our world.

Think about your life and all of your belongings. How are the four elements involved in things you own, such as your computer, your clothes, and the food you eat? Thinking about everyday objects on a small scale can help us (b) _____.

Words: chemistry = the science of what things are made of · makeup = what something is made of · philosopher = a person who thinks about big questions · theorize / theory = an idea about how something works · element = a basic thing that makes up everything · substance = a thing, a material · observation = what you see · flame = fire · prepare = make ready · indestructible = cannot be broken · unchangeable = cannot be changed · involved in = a part of · on a small scale = by looking at small things

1. According to the passage, who was Empedocles?

① an ancient Greek philosopher ② a Roman king
③ a modern chemist ④ a Chinese teacher
⑤ an Egyptian farmer

2. According to the passage, what were pots made with?

① fire and air ② wood and water
③ earth and water ④ earth and fire
⑤ water and air

3. What does the underlined word ancient mean?

① very new ② very old ③ very big ④ very small ⑤ very rich

4. What does the underlined word belongings mean?

① places that you visit ② people that you know
③ foods that you eat ④ games that you play
⑤ things that you own

5. Complete the table about the passage. Which words best fit (A) and (B)?

Element	Cooking with the Pot
earth	Plants come from it.
water	The plants are mixed with it.
(A) _____	The plants are cooked over it.
(B) _____	It cools down the food.

① (A) air ..... (B) fire ② (A) fire ..... (B) water
③ (A) water ..... (B) air ④ (A) fire ..... (B) air
⑤ (A) earth ..... (B) fire

6. Complete the summary of the passage. Which words best fit (A) and (B)?

Empedocles believed that everything was made of (A) _____ elements and that these elements could not be (B) _____.

① (A) two ..... (B) broken ② (A) four ..... (B) cooked
③ (A) four ..... (B) broken ④ (A) five ..... (B) seen
⑤ (A) two ..... (B) seen

7. What is paragraph 2 mainly about?

① how to make a pot at home
② why fire is dangerous
③ how Empedocles saw the four elements in making pots and meals
④ the history of Greek cooking
⑤ how scientists study elements today

8. What is the last paragraph mainly about?

① thinking about the four elements in the things we own
② buying new computers and clothes
③ cooking food over a flame
④ the life of Empedocles
⑤ how to become a philosopher

9. Which best fits in blank (a)?

① paint a picture ② build a house
③ start a fire ④ grow plants
⑤ make one pot

10. Which best fits in blank (b)?

① buy more things ② cook better food
③ become a philosopher ④ understand the world around us
⑤ forget the four elements

Unit 5 · Art

[1–10] Read the passage and answer the questions.

How did the teddy bear get its name? It comes from U.S. president Theodore Roosevelt. During a hunting trip, Roosevelt refused to kill a bear that had been tied to a tree. All over America, people heard about this story. Some people even made stuffed bears and called them "teddy bears" in honor of the president's nickname, Teddy.

Teddy bears became mass-produced in the twentieth century. They were mainly toys for children, but they were also popularly featured in books and even in movies. Some well-known examples include Winnie the Pooh, which was originally written for adults, as well as Paddington Bear. Due to their popularity, teddy bears were manufactured in a wide range of sizes, colors, and materials. They have endured such lasting popularity that there are museums dedicated to teddy bears all around the world. England, Japan, and South Korea are just a few countries that have teddy bear museums.

Whether they are children's toys, subjects of books, or objects on display at museums, teddy bears remain popular. They bring children comfort and are fun to play with. Teddy bears will probably be around for a long time to come.

Words: refuse = say no · stuffed bear = a toy bear · in honor of = to show respect for · mass-produced = made in large numbers · be featured in = appear in · manufacture = make · endure = last a long time · dedicated to = made for · subject = what a book is about

1. What does the underlined word nickname mean?

① a long, official name ② a family name
③ the name of a place ④ the name of a toy
⑤ a short, friendly name

2. What does the underlined word comfort mean?

① a loud noise ② a lot of money
③ a bad dream ④ a good, calm feeling
⑤ a long trip

3. According to the passage, what was the president's nickname?

① Theo ② Roosy ③ Teddy ④ Pooh ⑤ Paddington

4. According to the passage, which countries have teddy bear museums?

① England, Japan, and South Korea ② England, France, and China
③ Japan, China, and India ④ the United States, Canada, and Mexico
⑤ South Korea, Spain, and Italy

5. What does the underlined word them refer to?

① the people who heard the story ② the stuffed bears that some people made
③ the bears living in the forest ④ the president and his friends
⑤ the children who played with toys

6. What does the underlined word They refer to?

① children ② books and movies
③ museums ④ teddy bears
⑤ Winnie the Pooh and Paddington Bear

7. Which is the correct order of (A), (B), and (C), from first to last?

(A) People all over America heard about the story.
(B) Roosevelt refused to kill a bear tied to a tree.
(C) Some people made stuffed bears and called them "teddy bears."

① (B) – (A) – (C) ② (A) – (B) – (C)
③ (A) – (C) – (B) ④ (B) – (C) – (A)
⑤ (C) – (A) – (B)

8. Which is **NOT** true according to the passage?

① Teddy bears were mainly toys for children.
② Winnie the Pooh was first written for adults.
③ Teddy bears have been featured in books and movies.
④ Teddy bears bring children comfort.
⑤ Teddy bears come in only one size and color.

9. What can we learn from the passage?

① Roosevelt sold teddy bears to make money.
② The story about Roosevelt and the bear made teddy bears popular.
③ Teddy bears were first made in Japan.
④ Children do not like teddy bears anymore.
⑤ Teddy bears were named after a famous writer.

10. What can we learn from the passage?

① Teddy bears are made in only one country.
② Only American children play with teddy bears.
③ People in many countries love teddy bears.
④ Teddy bears are not sold anymore.
⑤ Teddy bear museums are found only in England.

Unit 6 · Nature

[1–10] Read the passage and answer the questions.

Molecules are always moving. Sometimes, molecules even move through membranes. Molecules tend to pass through semi-permeable membranes to an area where the solvent concentration is higher. This equalizes the concentration of materials on either side of the membrane. This process is called osmosis. Osmosis is an important chemical process with practical uses in everyday life. What is one use of osmosis?

Fresh vegetables have a high concentration of water molecules. During pickling, vegetables are placed in a brine—a mixture of water, salt, and seasonings. The skin acts as a semi-permeable membrane. Water molecules move out of the vegetables through the skin and into the brine, which equalizes the solvent concentration on either side of the membrane. This process is an example of osmosis, and it is why pickled vegetables stay crunchy.

Reverse osmosis is a process that uses pressure to force molecules into an area of lower solute concentration. We use reverse osmosis to remove salt and other particles from seawater. Afterward, we can drink the water!

Chemical processes like osmosis have a big effect on our everyday lives. For this reason, learning about how they work is important for our understanding of the world.

Words: molecule = a very small part of a thing · tend to = usually · membrane = a thin skin · semi-permeable membrane = a skin that lets only some things pass · solvent = the liquid (here, water) · solute = the thing in the liquid (here, salt) · concentration = how much of something is in a liquid · equalize = make equal · on either side of = on both sides of · pickling = making pickles · seasonings = things you add to food for taste · crunchy = hard, not soft · pressure = a strong push · remove = take out · particle = a very small piece · effect = a change that something makes

1. Which can best replace the underlined word force?

① push ② pull ③ stop ④ cool ⑤ count

2. Which can best replace the underlined word practical?

① strange ② useful ③ dangerous ④ expensive ⑤ slow

3. According to the passage, what acts as a semi-permeable membrane during pickling?

① the salt ② the brine
③ the water ④ the seasonings
⑤ the skin of the vegetables

4. According to the passage, what do we use reverse osmosis for?

① to make pickles ② to grow vegetables
③ to cool down food ④ to take salt out of seawater
⑤ to warm up seawater

5. Why does the writer say that pickled vegetables stay crunchy?

① to explain how to make vegetables soft ② to show that salt makes food taste good
③ to show a result of osmosis in pickling ④ to explain why vegetables are healthy
⑤ to show that brine is dangerous

6. Why does the writer mention seawater?

① to explain how fish live in salty water
② to show how pickles are made
③ to give an example of how reverse osmosis is used
④ to explain where salt comes from
⑤ to show that molecules stop moving in the sea

7. Which is **NOT** true according to the passage?

① Molecules sometimes move through membranes.
② Osmosis has uses in everyday life.
③ Pickles are made in a brine.
④ Reverse osmosis makes seawater saltier.
⑤ Learning about chemical processes helps us understand the world.

8. Which is true according to the passage?

① Molecules never move through membranes.
② Chemical processes have a big effect on our everyday lives.
③ Pickled vegetables lose their crunch in the brine.
④ Reverse osmosis is used to make pickles.
⑤ Osmosis is not used in everyday life.

9. Complete the summary of the passage. Which words best fit (A) and (B)?

During pickling, (A) _____ moves out of the vegetables and into the (B) _____.

① (A) water …… (B) brine ② (A) salt …… (B) brine
③ (A) water …… (B) skin ④ (A) salt …… (B) skin
⑤ (A) air …… (B) brine

10. Complete the summary of the passage. Which words best fit (A) and (B)?

Reverse osmosis uses (A) _____ to push molecules the other way, and after that we can (B) _____ the seawater.

① (A) heat …… (B) drink ② (A) pressure …… (B) sell
③ (A) salt …… (B) drink ④ (A) heat …… (B) cook
⑤ (A) pressure …… (B) drink

Unit 7 · Social Studies

[1–10] Read the passage and answer the questions.

People usually make tough decisions by voting for one of two or more options. The option that gets the most votes is the (a) _____. This is called majority rule. However, even if only 51% of people in a group vote for an option, they will get their choice. That means, almost half of the people in that group will not get their choice. In that case, is majority rule really fair?

Most democracies (b) _____ public officials through a majority vote. In a system with two political parties, a slim margin, such as 51% to 49%, can decide an election. In a system with more than two parties, less than 50% of voters could give one political party a victory. To ensure the fairness of majority rule, certain conditions must be met. First, people should be able to vote with secret ballots. Second, each person's vote should be weighted equally. Finally, there have to be enough voters to make a majority vote truly fair.

When an election is won with less than 50% of the total votes, the winning party must consider the opinions of the other voters. This is because running a democracy should ensure equality for all citizens.

Words: tough decision = a hard choice · vote = choose by marking a paper · option = a choice · majority = more than half · democracy = a country where people vote for their leaders · public official = a person who works for the government · political party = a group of people who try to win elections · slim margin = a very small difference · victory = a win · ensure = make sure · fairness = being fair · condition = something that must be true · be met = be followed · secret ballot = voting where no one sees your choice · be weighted equally = count the same · consider = think about · opinion = what a person thinks · citizen = a person of a country · equality = everyone being treated the same

1. According to the passage, how do people usually make tough decisions?

① by fighting ② by voting
③ by guessing ④ by asking a teacher
⑤ by flipping a coin

2. According to the passage, what can decide an election in a two-party system?

① only a margin of 90% to 10% ② the age of the voters
③ a slim margin, such as 51% to 49% ④ the number of parties
⑤ the weather on election day

3. Which word best fits in blank (a)?

① winner ② loser ③ voter ④ party ⑤ question

4. Which word best fits in blank (b)?

① forget ② pay ③ teach ④ follow ⑤ elect

5. What is paragraph 1 mainly about?

① how public officials are elected ② the three conditions for a fair vote
③ why secret ballots are important ④ what majority rule is and a problem with it
⑤ how many parties a democracy needs

6. What is the best title for the passage?

① Is Majority Rule Always Fair? ② How to Win an Election
③ The History of Democracy ④ Why People Hate Voting
⑤ The Life of a Public Official

7. Which is true according to the passage?

① Every voter gets their choice under majority rule.
② A party needs 100% of the votes to win.
③ Secret ballots are not allowed in democracies.
④ In a democracy, only leaders can vote.
⑤ Almost half of a group may not get their choice under majority rule.

8. Which is **NOT** true according to the passage?

① Each person's vote should be weighted equally.
② Most democracies choose public officials by a majority vote.
③ A majority vote is fair even when very few people vote.
④ Running a democracy should ensure equality for all citizens.
⑤ Secret ballots are one condition for a fair majority vote.

9. Which idea would the writer most likely agree with?

① The losing side in a vote does not matter.
② A vote with two voters is as fair as a vote with a thousand.
③ Leaders should know how each person voted.
④ A democracy should care about the people who lost the vote, too.
⑤ A party with 51% should ignore the other 49%.

10. What can we learn from the passage?

① Majority rule is used only in countries with two parties.
② Majority rule can give the victory to a party that most voters did not choose.
③ Elections are always decided by more than 90% of the votes.
④ Public officials are chosen by the president.
⑤ Secret ballots make elections unfair.

Unit 8 · Science

[1–10] Read the passage and answer the questions.

Throughout history, humans have looked at the stars as a map, as a guide, and for worship. The invention of the telescope has helped humans (a) _____. How have telescopes changed over time?

Telescopes were originally used to see long distances. Galileo was one of the first to use a telescope to observe the stars. His telescope used a concave eyepiece and a convex lens. This gave the image seen through the telescope an upright view and magnified it up to thirty times! Even though Galileo's telescope was quite useful at the time, the images it produced were blurry. Kepler improved on Galileo's design by using a convex eyepiece and lens. This gave a much wider field of view, even though the images appeared upside-down.

In modern times, telescopes have been launched into space to help astronomers observe (b) _____. One example is the Hubble Telescope, which orbits Earth and sends back high-quality pictures of distant planets and galaxies. Through continued technological developments, humans can understand the universe much better.

Words: worship = praying to a god · invention = making something new for the first time · observe = watch carefully · astronomer = a person who studies the stars · concave = curved in · convex = curved out · eyepiece = the part you look into · upright = with the top at the top (not upside-down) · magnify = make bigger · blurry = not clear · field of view = how much you can see · upside-down = the top at the bottom · launch = send into space · orbit = go around · distant = far away · galaxy = a very large group of stars · continued = going on · technological development = new technology

1. According to the passage, who was one of the first to use a telescope to observe the stars?

① Kepler ② Hubble ③ Newton ④ Galileo ⑤ Einstein

2. According to the passage, what does the Hubble Telescope send back?

① rocks from the Moon ② maps of the oceans
③ weather reports ④ radio songs
⑤ pictures of distant planets and galaxies

3. What does the underlined word originally mean?

① at last ② at first ③ never ④ always ⑤ later

4. What does the underlined word improved mean?

① broke ② copied ③ made better ④ sold ⑤ forgot

5. Complete the table about the passage. Which words best fit (A) and (B)?

	What people did
Long ago	They looked at the stars as a (A) _____, as a guide, and for worship.
With telescopes	They could see (B) _____.

① (A) map …… (B) long distances ② (A) map …… (B) small animals
③ (A) friend …… (B) long distances ④ (A) friend …… (B) the bottom of the sea
⑤ (A) toy …… (B) small animals

6. Complete the summary of the passage. Which words best fit (A) and (B)?

Galileo's telescope made the image (A) _____ and much bigger, but the image was (B) _____.

① (A) upside-down …… (B) blurry ② (A) upright …… (B) clear
③ (A) upside-down …… (B) clear ④ (A) small …… (B) dark
⑤ (A) upright …… (B) blurry

7. What is paragraph 2 mainly about?

① how to build a telescope
② how Galileo's and Kepler's telescopes were different
③ why the stars are far away
④ the life of Galileo
⑤ how the Hubble Telescope works

8. What is paragraph 3 mainly about?

① the first telescope in history
② how people used stars as maps
③ Kepler's new design
④ telescopes in space, like the Hubble Telescope
⑤ why images look blurry

9. Which best fits in blank (a)?

① travel to the stars
② make maps of Earth
③ see and understand the stars better
④ build taller buildings
