The Reading 7-1 Final Test

English Reading · Level 7 · Units 1–8 · 60 minutes

Class _____ Name _____ Score _____

• 40 questions · 5 choices · 2.5 points each (100 points) · **Pass: 70 points (28 correct)** · Choose one answer.

Unit 1 · Art

[1–5] Read the passage and answer the questions.

Art in advertisements has become increasingly popular. This is called commercial art. One of the most famous commercial artists was Andy Warhol.

Andy Warhol was often sick as a child, so he spent a lot of time drawing. After college, he began his career making art for advertisements. His drawings of shoes became so well known that people wanted to see more of his work. Thus, in the 1950s, he began showing his popular works in art galleries. Warhol was one of the first artists to use silkscreen ink printing in his work. During the 1960s, he produced many famous art pieces depicting everyday objects. These include Coca-Cola bottles, dollar bills, and Campbell's Soup cans. This kind of art is referred to as "pop art."

Some critics think Andy Warhol was only interested in making money with his art. Others thought he was the perfect example of commercialized modern life. Apart from this argument, most critics agree that Warhol's work shows the changing value of art in everyday life.

Words: increasingly = more and more · advertisement = an ad · silkscreen ink printing = a way of printing pictures · depict = show, draw · critic = a person who gives opinions about art

1. What does the underlined word popular mean? [2.5 pts]

① expensive ② old
③ liked by many people ④ quiet
⑤ strange

2. According to the passage, why did Andy Warhol draw a lot as a child? [2.5 pts]

① His parents were artists. ② He was often sick.
③ He went to an art school. ④ He wanted to sell his drawings.
⑤ His friends liked his drawings.

3. What does the underlined word These refer to? [2.5 pts]

① the advertisements Warhol made ② the art galleries that showed his works
③ Warhol's art pieces of everyday objects ④ Warhol's drawings of shoes
⑤ the critics who wrote about Warhol

4. Which is the correct order of (A), (B), and (C) as they happened? [2.5 pts]

(A) Warhol began showing his works in art galleries.
(B) Warhol started his first job after college.
(C) Warhol made the works called "pop art."

① (A) – (B) – (C) ② (A) – (C) – (B)
③ (B) – (C) – (A) ④ (C) – (A) – (B)
⑤ (B) – (A) – (C)

5. What can we learn from the passage? [2.5 pts]

① Warhol stopped making art after he became famous.
② Everyone had the same opinion about Warhol's art.
③ Warhol invented silkscreen ink printing.
④ Warhol's work in advertising made him a famous artist.
⑤ Art in advertisements is called "pop art."

Unit 2 · Nature

[6–10] Read the passage and answer the questions.

The water cycle is necessary for life on Earth. Water on the ground evaporates into vapor and forms clouds in the sky. In return, rain brings water back down to the ground again, which ends up in streams, rivers, lakes, and oceans. What happens when humans tamper with the water cycle?

Most evaporation occurs in oceans as a result of the Sun's energy. This cools the temperature of Earth's climate and also affects the oceans' salt content. Having the correct amount of salt in the oceans maintains a delicate ecosystem of plants, fish, and other wildlife. One example of a disaster caused by tampering with the water cycle is the drying-up of the Aral Sea. The two rivers that fed the Aral Sea were diverted for farming in the desert. As a result, the sea is now almost completely dry, killing the wildlife that lived there and causing dust storms that affect human health.

As we can see, the water cycle is necessary to keep the environment balanced.

Words: evaporate = change into gas · vapor = water in the air · tamper with = change something in a bad way · salt content = the amount of salt · ecosystem = all the living things in a place · disaster = a very bad event · divert = change the way of a river · dust storm = a strong wind full of dust

6. Which word can replace the underlined word maintains? [2.5 pts]

① keeps ② breaks ③ loses ④ changes ⑤ makes

7. According to the passage, why did people divert the two rivers that fed the Aral Sea? [2.5 pts]

① to build a new city ② to make electricity
③ to stop dust storms ④ to farm in the desert
⑤ to protect wild animals

8. Why does the writer talk about the Aral Sea? [2.5 pts]

① to teach how to keep people healthy
② to show a disaster caused by changing the water cycle
③ to explain why the salt in the oceans changes
④ to tell where the biggest lake in the world is
⑤ to explain how rain is made in the clouds

9. Which is **NOT** true according to the passage? [2.5 pts]

① Rain brings water back down to the ground.
② Evaporation affects the salt in the oceans.
③ Most evaporation happens in rivers and lakes.
④ The Aral Sea is now almost completely dry.
⑤ Dust storms from the Aral Sea affect people's health.

10. Complete the summary of the passage. Which words best fit (A) and (B)? [2.5 pts]

The Sun's energy makes water evaporate, and this makes Earth's climate (A) _____. The water cycle keeps the environment (B) _____.

① (A) warmer ..... (B) balanced ② (A) cooler ..... (B) dirty
③ (A) warmer ..... (B) dry ④ (A) drier ..... (B) balanced
⑤ (A) cooler ..... (B) balanced

Unit 3 · Social Studies

[11–15] Read the passage and answer the questions.

In the 1980s, people who protested the increasing trend of fast food started a “slow food” movement. The movement aimed to preserve local foods, recipes, and communities, while rejecting fast, commercialized foods. This inspired the “slow city movement.”

The first Slow City was Chianti, Italy. The people there wanted to keep nature in good shape and _____ historic buildings. They came up with a plan for developing their town just the way they wanted. They called this plan cittaslow. The founders of this plan decided that new developments should keep people healthy and promote good relationships among neighbors. They also thought development should not hurt the natural environment.

Since 1999, dozens of cities around the world have been named Slow Cities. Slow Cities do not have many fast-food restaurants or big supermarkets. Instead, they have locally owned restaurants and small markets. Try visiting a Slow City someday to see if you like it!

Words: protest = say no to something · trend = what many people do · preserve = keep · reject = say no to · commercialized = made to make money · inspire = give an idea · historic = old and important · come up with = think of · founder = a person who starts something · promote = help something grow · dozens of = many · locally owned = owned by people in the town

11. According to the passage, where was the first Slow City? [2.5 pts]

① Rome, Italy ② Chianti, Italy ③ Paris, France ④ Seoul, Korea ⑤ Madrid, Spain

12. Which word best fits in the blank? [2.5 pts]

① destroy ② sell ③ forget ④ build ⑤ protect

13. What is the passage mainly about? [2.5 pts]

① how Slow Cities began and what they are like
② health problems from eating too much fast food
③ the best Slow Cities to visit in Italy
④ how to open a small restaurant in a Slow City
⑤ why big supermarkets are popular in Slow Cities

14. Which is true according to the passage? [2.5 pts]

① Slow Cities have small markets and local restaurants instead of big supermarkets.
② The slow food movement started in the 1990s.
③ The slow city movement inspired the slow food movement.
④ Cittaslow is the name of an old building in Italy.
⑤ Only two cities have become Slow Cities since 1999.

15. Which idea would the writer most likely agree with? [2.5 pts]

① Fast food is the right food for busy city people.
② More big supermarkets make neighbors closer.
③ A Slow City should not develop its town at all.
④ A town can develop without hurting nature or people’s health.
⑤ A town must be in Italy to become a Slow City.

Unit 4 · Science

[16–20] Read the passage and answer the questions.

Before modern chemistry, ancient people tried to understand the makeup of the world. The ancient Greek philosopher Empedocles theorized that four elements made up every substance known to man. These elements were water, fire, earth, and air.

What observations did Empedocles make about these elements? First, he noted that pots were made with earth and water. After being mixed and shaped, they were burned with fire and cooled with air. All four elements were necessary to make one pot. The same pot was used for cooking plants from the earth, often mixed with water, over a flame. The air cooled down the food so it could be eaten. Thus, all four elements were necessary to _____. Empedocles also believed that these elements were indestructible and unchangeable. His theories inspired later scientists to study more about the elements that make up our world.

Words: chemistry = the science of what things are made of · makeup = what something is made of · philosopher = a person who thinks about big questions · theorize = make a theory · element = a basic thing that makes up everything · substance = a thing, a material · observation = what you see · flame = fire

16. Which is **NOT** one of the four elements Empedocles talked about? [2.5 pts]

① water ② fire ③ earth ④ wood ⑤ air

17. What does the underlined word indestructible mean? [2.5 pts]

① cannot be broken ② very old
③ delicious ④ modern
⑤ very expensive

18. Complete the table about the passage. Which words best fit (A) and (B)? [2.5 pts]

Making a Pot	
1	Pots are made with earth and water.
2	They are mixed and shaped.
3	They are burned with (A) _____.
4	They are cooled with (B) _____.

① (A) air ..... (B) fire ② (A) fire ..... (B) water
③ (A) water ..... (B) air ④ (A) wood ..... (B) water
⑤ (A) fire ..... (B) air

19. What is the best title for the passage? [2.5 pts]

① How to Make a Pot with Earth and Water ② Empedocles and the Four Elements
③ The Lives of Ancient Greek Philosophers ④ Why Fire Is the Most Important Element
⑤ How Modern Scientists Do Experiments

20. Which best fits in the blank? [2.5 pts]

① build a house ② sell the pot ③ cook food ④ grow plants ⑤ start a fire

Unit 5 · Art

[21–25] Read the passage and answer the questions.

How did the teddy bear get its name? It comes from U.S. president Theodore Roosevelt. During a hunting trip, Roosevelt refused to kill a bear that had been tied to a tree. All over America, people heard about this story. Some people even made stuffed bears and called them “teddy bears” in honor of the president’s nickname, Teddy.

Teddy bears became mass-produced in the twentieth century. They were mainly toys for children, but they were also popularly featured in books and even in movies. Some well-known examples include Winnie the Pooh, which was originally written for adults, as well as Paddington Bear. Due to their popularity, teddy bears were manufactured in a wide range of sizes, colors, and materials. They have endured such lasting popularity that there are museums dedicated to teddy bears all around the world. England, Japan, and South Korea are just a few countries that have teddy bear museums.

Whether they are children’s toys, subjects of books, or objects on display at museums, teddy bears remain popular. Teddy bears will probably be around for a long time to come.

Words: refuse = say no · stuffed bear = a toy bear · in honor of = to show respect for · nickname = a short, friendly name · mass-produced = made in large numbers · be featured in = appear in · manufacture = make · dedicated to = made for

21. What does the underlined word materials mean? [2.5 pts]

① sizes ② colors
③ prices ④ shapes
⑤ things used to make something

22. According to the passage, whose nickname gave the teddy bear its name? [2.5 pts]

① a famous toy maker ② the writer of Winnie the Pooh
③ the president of the United States ④ the man who tied the bear to a tree
⑤ a museum owner in Japan

23. What does the underlined this story refer to? [2.5 pts]

① Roosevelt became the president of the United States.
② People made stuffed bears and called them “teddy bears.”
③ Winnie the Pooh was written for adults.
④ Roosevelt did not kill a bear tied to a tree.
⑤ A bear ran away from the hunters.

24. Which is the correct order of (A), (B), and (C) as they happened? [2.5 pts]

(A) Teddy bears were mass-produced in the twentieth century.
(B) Roosevelt went on a hunting trip.
(C) People made stuffed bears and called them “teddy bears.”

① (A) – (B) – (C) ② (B) – (C) – (A)
③ (A) – (C) – (B) ④ (B) – (A) – (C)
⑤ (C) – (A) – (B)

25. What can we learn from the passage? [2.5 pts]

① People liked Roosevelt for not killing the bear.
② Teddy bears were popular only in America.
③ Roosevelt made the first teddy bear himself.
④ Teddy bears will soon lose their popularity.
⑤ Teddy bears were mainly toys for adults.

Unit 6 · Nature

[26–30] Read the passage and answer the questions.

Molecules are always moving. Sometimes, molecules even move through membranes. Molecules tend to pass through semi-permeable membranes to an area where the solvent concentration is higher. This equalizes the concentration of materials on either side of the membrane. This process is called osmosis. Osmosis is an important chemical process with practical uses in everyday life. What is one use of osmosis?

Fresh vegetables have a high concentration of water molecules. During pickling, vegetables are placed in a brine—a mixture of water, salt, and seasonings. The skin acts as a semi-permeable membrane. Water molecules move out of the vegetables through the skin and into the brine, which equalizes the solvent concentration on either side of the membrane. This process is an example of osmosis, and it is why pickled vegetables stay crunchy.

Reverse osmosis is a process that uses pressure to force molecules into an area of lower solute concentration. We use reverse osmosis to remove salt and other particles from seawater. Afterward, we can drink the water!

Words: molecule = a very small part of a thing · membrane = a thin skin · semi-permeable membrane = a skin that lets only some things pass · solvent = the liquid (here, water) · solute = the thing in the liquid (here, salt) · concentration = how much of something is in a liquid · equalize = make equal · on either side of = on both sides of · pickling = making pickles · crunchy = hard and fresh · pressure = a strong push · particle = a very small piece

26. Which words can replace the underlined word remove? [2.5 pts]

① take out ② put in ③ cut ④ wash ⑤ buy

27. According to the passage, what is brine made of? [2.5 pts]

① water, sugar, and oil ② salt, vinegar, and sugar
③ salt, seasonings, and oil ④ water, salt, and seasonings
⑤ water, vinegar, and pepper

28. Why does the writer talk about pickling? [2.5 pts]

① to teach how to grow fresh vegetables
② to explain how to make brine step by step
③ to show how to make seawater drinkable
④ to explain when molecules stop moving
⑤ to give an example of osmosis in everyday life

29. Which is **NOT** true according to the passage? [2.5 pts]

① Molecules are always moving.
② The skin of a vegetable acts as a semi-permeable membrane.
③ During pickling, water moves out of the vegetables.
④ Pickled vegetables become soft in the brine.
⑤ Seawater can be drunk after reverse osmosis.

30. Complete the summary of the passage. Which words best fit (A) and (B)? [2.5 pts]

Osmosis makes the concentration on both sides of a membrane (A) _____. Reverse osmosis uses (B) _____ to force molecules through the membrane, and it makes seawater drinkable.

① (A) higher …… (B) heat ② (A) the same …… (B) salt
③ (A) the same …… (B) pressure ④ (A) lower …… (B) heat
⑤ (A) higher …… (B) pressure

Unit 7 · Social Studies

[31–35] Read the passage and answer the questions.

People usually make tough decisions by voting for one of two or more options. The option that gets the most votes is the winner. This is called majority rule. However, even if only 51% of people in a group vote for an option, they will get their choice. That means, almost half of the people in that group will not get their choice. In that case, is majority rule really fair?

Most democracies elect public officials through a majority vote. In a system with two political parties, a slim margin, such as 51% to 49%, can decide an election. In a system with more than two parties, less than 50% of voters could give one political party a victory. To ensure the _____ of majority rule, certain conditions must be met. First, people should be able to vote with secret ballots. Second, each person's vote should be weighted equally. Finally, there have to be enough voters to make a majority vote truly fair.

When an election is won with less than 50% of the total votes, the winning party must consider the opinions of the other voters. This is because running a democracy should ensure equality for all citizens.

Words: tough decision = a hard choice · option = a choice · democracy = a country where people vote for their leaders · elect = choose by voting · public official = a person who works for the government · political party = a group of people in politics · slim margin = a very small difference · ensure = make sure · condition = something that must be true · be met = be satisfied · secret ballot = voting where no one sees your choice · be weighted equally = count the same · citizen = a person of a country · equality = being equal

31. According to the passage, which option wins under majority rule? [2.5 pts]

① the option chosen by the oldest person ② the option that everyone agrees on
③ the option that gets the most votes ④ the option the president likes best
⑤ the option that gets the fewest votes

32. Which word best fits in the blank? [2.5 pts]

① victory ② speed ③ price ④ fairness ⑤ size

33. What is the passage mainly about? [2.5 pts]

① majority rule and what it needs to work well
② how a slim margin decides a two-party election
③ the history of majority rule in democracies
④ why every democracy needs secret ballots
⑤ the jobs of public officials in a democracy

34. Which is true according to the passage? [2.5 pts]

① Under majority rule, the winner always gets more than 90% of the votes.
② Most democracies choose public officials without voting.
③ Each person's vote should have a different weight.
④ With two parties, an election is never decided by a slim margin.
⑤ With more than two parties, a party can win with less than 50% of the votes.

35. Which idea would the writer most likely agree with? [2.5 pts]

① More voters do not make a majority vote fairer.
② A decision made by majority rule may not be fair to everyone.
③ A winning party does not need to listen to people who did not vote for it.
④ A leader's vote should count more than other people's votes.
⑤ People should vote where everyone can see their choice.

Unit 8 · Science

[36–40] Read the passage and answer the questions.

The invention of the telescope has helped humans see and understand the stars better. How have telescopes changed over time?

Telescopes were originally used to see long distances. Galileo was one of the first to use a telescope to observe the stars. His telescope used a concave eyepiece and a convex lens. This gave the image seen through the telescope an upright view and magnified it up to thirty times! Even though Galileo's telescope was quite useful at the time, the images it produced were blurry. Kepler improved on Galileo's design by using a convex eyepiece and lens. This gave a much wider field of view, even though the images appeared upside-down.

In modern times, telescopes have been launched into space to help astronomers observe not just the stars, but the universe as well. One example is the Hubble Telescope, which orbits Earth and sends back high-quality pictures of distant planets and galaxies. Through continued technological developments, humans can _____.

Words: invention = a new thing that someone made · observe = watch carefully · concave = curved in · convex = curved out · eyepiece = the part you look into · upright = the right way up · magnify = make bigger · blurry = not clear · field of view = how much you can see · upside-down = the top at the bottom · launch = send into space · orbit = go around · galaxy = a very large group of stars · continued = going on · technological development = new technology

36. According to the passage, how many times could Galileo's telescope magnify an image? [2.5 pts]

① three times ② five times ③ ten times ④ twenty times ⑤ thirty times

37. What does the underlined word astronomers mean? [2.5 pts]

① people who invent new things ② people who study the stars and space
③ people who fly airplanes ④ people who grow crops
⑤ people who design buildings

38. Complete the table about the passage. Which words best fit (A) and (B)? [2.5 pts]

	Galileo's telescope	**Kepler's telescope**
eyepiece	(A) _____	convex
lens	convex	convex
images	upright, but blurry	wider view, but (B) _____

① (A) convex ..... (B) upside-down ② (A) concave ..... (B) blurry
③ (A) concave ..... (B) upside-down ④ (A) convex ..... (B) upright
⑤ (A) concave ..... (B) clear

39. What is the best title for the passage? [2.5 pts]

① How to Make Your Own Telescope ② The Development of Telescopes
③ The Weak Points of Galileo's Telescope ④ What the Hubble Telescope Does
⑤ Different Ways to Watch the Stars

40. Which best fits in the blank? [2.5 pts]

① understand the universe much better ② make Galileo's telescope again
③ see the stars without any telescope ④ stop launching telescopes into space
⑤ live on distant planets
