The Reading 7-1 Final Test

English Reading · Level 7 · Units 1–8 · 60 minutes

Class _____ Name _____ Score _____

• 40 questions · 5 choices · 2.5 points each (100 points) · **Pass: 70 points (28 correct)** · Choose one answer.

Unit 1 · Art

[1–5] Read the passage and answer the questions.

Art in advertisements has become increasingly popular. This is called commercial art. One of the most famous commercial artists was Andy Warhol.

Andy Warhol was often sick as a child, so he spent a lot of time drawing. After college, he began his career making art for advertisements. His drawings of shoes became so well known that people wanted to see more of his work. Thus, in the 1950s, he began showing his popular works in art galleries. Warhol was one of the first artists to use silkscreen ink printing in his work. During the 1960s, he produced many famous art pieces depicting everyday objects. These include Coca-Cola bottles, dollar bills, and Campbell's Soup cans. This kind of art is referred to as "pop art."

Some critics think Andy Warhol was only interested in making money with his art. Others thought he was the perfect example of commercialized modern life. Apart from this argument, most critics agree that Warhol's work shows the changing value of art in everyday life.

Words: increasingly = more and more · advertisement = a picture or words that tell people to buy something · silkscreen ink printing = a way of printing pictures · depict = show, draw · critic = a person who gives opinions about art

1. What does the underlined word popular mean? [2.5 pts]

① sold for a lot of money ② made a long time ago
③ liked by many people ④ used by only a few people
⑤ known by nobody

2. According to the passage, why did Andy Warhol draw a lot as a child? [2.5 pts]

① His parents were artists. ② He was often sick.
③ He went to an art school. ④ He wanted to sell his drawings.
⑤ His friends liked his drawings.

3. What does the underlined word These refer to? [2.5 pts]

① the advertisements Warhol made ② the art galleries that showed his works
③ Warhol's art pieces of everyday objects ④ Warhol's drawings of shoes
⑤ the critics who wrote about Warhol

4. Which is the correct order of (A), (B), and (C), from first to last? [2.5 pts]

(A) Warhol began showing his works in art galleries.
(B) Warhol started his first job after college.
(C) Warhol made the works called "pop art."

① (A) – (B) – (C) ② (A) – (C) – (B)
③ (B) – (C) – (A) ④ (C) – (A) – (B)
⑤ (B) – (A) – (C)

5. What can we learn from the passage? [2.5 pts]

① Warhol stopped making art after he became famous.
② Everyone had the same opinion about Warhol's art.
③ Warhol invented silkscreen ink printing.
④ Warhol's art for advertisements made him a famous artist.
⑤ Art in advertisements is called "pop art."

Unit 2 · Nature

[6–10] Read the passage and answer the questions.

The water cycle is necessary for life on Earth. Water on the ground evaporates into vapor and forms clouds in the sky. In return, rain brings water back down to the ground again, which ends up in streams, rivers, lakes, and oceans. What happens when humans tamper with the water cycle?

Most evaporation occurs in oceans as a result of the Sun's energy. This cools the temperature of Earth's climate and also affects the oceans' salt content. Having the correct amount of salt in the oceans maintains a delicate ecosystem of plants, fish, and other wildlife. One example of a disaster caused by tampering with the water cycle is the drying-up of the Aral Sea. The two rivers that fed the Aral Sea were diverted for farming in the desert. As a result, the sea is now almost completely dry, killing the wildlife that lived there and causing dust storms that affect human health.

As we can see, the water cycle is necessary to keep the environment balanced.

Words: evaporate = change into gas · vapor = water in the air · tamper with = change something in a bad way · affect = change something · salt content = the amount of salt · ecosystem = all the living things in a place · disaster = a very bad event · fed = brought water to · divert = make a river go a different way · dust storm = a strong wind full of dust

6. Which can best replace the underlined word maintains? [2.5 pts]

① breaks ② keeps ③ loses ④ changes ⑤ hurts

7. According to the passage, why did people divert the two rivers that went into the Aral Sea? [2.5 pts]

① to build a new city ② to make electricity
③ to stop dust storms ④ to farm in the desert
⑤ to protect wild animals

8. Why does the writer talk about the Aral Sea? [2.5 pts]

① to teach how to keep people healthy
② to show what can happen when people change the water cycle
③ to explain why the salt in the oceans changes
④ to tell where the biggest lake in the world is
⑤ to explain how rain is made in the clouds

9. Which is **NOT** true according to the passage? [2.5 pts]

① Rain brings water back down to the ground.
② Evaporation affects the salt in the oceans.
③ Most evaporation happens in rivers and lakes.
④ The Aral Sea is now almost completely dry.
⑤ Dust storms from the Aral Sea affect people's health.

10. Complete the summary of the passage. Which words best fit (A) and (B)? [2.5 pts]

The Sun's energy makes water evaporate, and this makes Earth's climate (A) _____. The water cycle keeps the environment (B) _____.

① (A) warmer ..... (B) balanced ② (A) cooler ..... (B) dirty
③ (A) warmer ..... (B) dry ④ (A) drier ..... (B) balanced
⑤ (A) cooler ..... (B) balanced

Unit 3 · Social Studies

[11–15] Read the passage and answer the questions.

In the 1980s, people who protested the increasing trend of fast food started a “slow food” movement. The movement aimed to preserve local foods, recipes, and communities, while rejecting fast, commercialized foods. This inspired the “slow city movement.”

The first Slow City was Chianti, Italy. The people there wanted to keep nature in good shape and _____ historic buildings. They came up with a plan for developing their town just the way they wanted. They called this plan cittaslow. The founders of this plan decided that new developments should keep people healthy and promote good relationships among neighbors. They also thought development should not hurt the natural environment.

Since 1999, dozens of cities around the world have been named Slow Cities. Slow Cities do not have many fast-food restaurants or big supermarkets. Instead, they have locally owned restaurants and small markets. Try visiting a Slow City someday to see if you like it!

Words: protest = say no to something · trend = what many people do · preserve = keep · reject = say no to · commercialized = made to make money · inspire = give an idea · historic = old and important · come up with = think of · founder = a person who starts something · promote = help something grow · dozens of = many · locally owned = owned by people in the town

11. According to the passage, where was the first Slow City? [2.5 pts]

① Rome, Italy ② Chianti, Italy ③ Paris, France ④ Seoul, Korea ⑤ Madrid, Spain

12. Which word best fits in the blank? [2.5 pts]

① destroy ② sell ③ forget ④ build ⑤ protect

13. What is the passage mainly about? [2.5 pts]

① how Slow Cities began and what they are like
② health problems from eating too much fast food
③ the best Slow Cities to visit in Italy
④ how to open a small restaurant in a Slow City
⑤ why big supermarkets are popular in Slow Cities

14. Which is true according to the passage? [2.5 pts]

① You will not find many big supermarkets in a Slow City.
② People started the slow food movement in the 1990s.
③ The slow city movement gave people the idea for slow food.
④ Cittaslow is the name of an old building in Italy.
⑤ Only two cities in the world have become Slow Cities.

15. Which idea would the writer most likely agree with? [2.5 pts]

① Busy people need more fast-food restaurants in their town.
② Big supermarkets help neighbors become good friends.
③ A Slow City should stop all new building in the town.
④ A town can grow without hurting nature or its people.
⑤ Only towns in Italy can follow the cittaslow plan.

Unit 4 · Science

[16–20] Read the passage and answer the questions.

Before modern chemistry, ancient people tried to understand the makeup of the world. The ancient Greek philosopher Empedocles theorized that four elements made up every substance known to man. These elements were water, fire, earth, and air.

What observations did Empedocles make about these elements? First, he noted that pots were made with earth and water. After being mixed and shaped, they were burned with fire and cooled with air. All four elements were necessary to make one pot. The same pot was used for cooking plants from the earth, often mixed with water, over a flame. The air cooled down the food so it could be eaten. Thus, all four elements were necessary to _____. Empedocles also believed that these elements were indestructible and unchangeable. His theories inspired later scientists to study more about the elements that make up our world.

Words: chemistry = the science of what things are made of · makeup = what something is made of · philosopher = a person who thinks about big questions · theorize / theory = an idea about how something works · element = a basic thing that makes up everything · substance = a thing, a material · observation = what you see · flame = fire · thus = so · necessary = needed

16. According to the passage, which is **NOT** one of the elements? [2.5 pts]

① water ② fire ③ wood ④ earth ⑤ air

17. What does the underlined word indestructible mean? [2.5 pts]

① cannot be broken ② cannot be eaten
③ cannot be moved ④ cannot be heard
⑤ cannot be sold

18. Complete the table about the passage. Which words best fit (A) and (B)? [2.5 pts]

Making a Pot	
1	Pots are made with (A) _____ and water.
2	They are mixed and shaped.
3	They are burned with fire.
4	They are cooled with (B) _____.

① (A) earth ..... (B) fire ② (A) fire ..... (B) air
③ (A) water ..... (B) fire ④ (A) air ..... (B) water
⑤ (A) earth ..... (B) air

19. What is the best title for the passage? [2.5 pts]

① How to Make a Pot with Earth and Water ② Empedocles and the Four Elements
③ The Lives of Ancient Greek Philosophers ④ Why Fire Is the Most Important Element
⑤ How Scientists Work Today

20. Which best fits in the blank? [2.5 pts]

① build a house ② sell the pot ③ cook food ④ grow plants ⑤ start a fire

Unit 5 · Art

[21–25] Read the passage and answer the questions.

How did the teddy bear get its name? It comes from U.S. president Theodore Roosevelt. During a hunting trip, Roosevelt refused to kill a bear that had been tied to a tree. All over America, people heard about this story. Some people even made stuffed bears and called them “teddy bears” in honor of the president’s nickname, Teddy.

Teddy bears became mass-produced in the twentieth century. They were mainly toys for children, but they were also popularly featured in books and even in movies. Some well-known examples include Winnie the Pooh, which was originally written for adults, as well as Paddington Bear. Due to their popularity, teddy bears were manufactured in a wide range of sizes, colors, and materials. They have endured such lasting popularity that there are museums dedicated to teddy bears all around the world. England, Japan, and South Korea are just a few countries that have teddy bear museums.

Whether they are children’s toys, subjects of books, or objects on display at museums, teddy bears remain popular. Teddy bears will probably be around for a long time to come.

Words: refuse = say no · stuffed bear = a toy bear · in honor of = to show respect for · nickname = a short, friendly name · mass-produced = made in large numbers · be featured in = appear in · manufacture = make · dedicated to = made for

21. What does the underlined word materials mean? [2.5 pts]

① how big something is ② what color something is
③ how much something costs ④ what shape something is
⑤ what something is made of

22. According to the passage, whose nickname gave the teddy bear its name? [2.5 pts]

① the president of the United States ② a famous toy maker
③ the writer of Winnie the Pooh ④ the man who tied the bear to a tree
⑤ a museum owner in Japan

23. What does the underlined this story refer to? [2.5 pts]

① Roosevelt became the president of the United States.
② People made stuffed bears and called them “teddy bears.”
③ Winnie the Pooh was written for adults.
④ Roosevelt did not kill a bear tied to a tree.
⑤ A bear ran away from the hunters.

24. Which is the correct order of (A), (B), and (C), from first to last? [2.5 pts]

(A) Teddy bears were mass-produced in the twentieth century.
(B) Roosevelt went on a hunting trip.
(C) People made stuffed bears and called them “teddy bears.”

① (A) – (B) – (C) ② (B) – (C) – (A)
③ (A) – (C) – (B) ④ (B) – (A) – (C)
⑤ (C) – (A) – (B)

25. What can we learn from the passage? [2.5 pts]

① People liked Roosevelt because he did not kill the bear.
② Teddy bears were popular only in America.
③ Roosevelt made the first teddy bear himself.
④ Teddy bears will soon lose their popularity.
⑤ Teddy bears were mainly toys for adults.

Unit 6 · Nature

[26–30] Read the passage and answer the questions.

Molecules are always moving. Sometimes, molecules even move through membranes. Molecules tend to pass through semi-permeable membranes to an area where the solvent concentration is higher. This equalizes the concentration of materials on either side of the membrane. This process is called osmosis. Osmosis is an important chemical process with practical uses in everyday life. What is one use of osmosis?

Fresh vegetables have a high concentration of water molecules. During pickling, vegetables are placed in a brine—a mixture of water, salt, and seasonings. The skin acts as a semi-permeable membrane. Water molecules move out of the vegetables through the skin and into the brine, which equalizes the solvent concentration on either side of the membrane. This process is an example of osmosis, and it is why pickled vegetables stay crunchy.

Reverse osmosis is a process that uses pressure to force molecules into an area of lower solute concentration. We use reverse osmosis to remove salt and other particles from seawater. Afterward, we can drink the water!

Words: molecule = a very small part of a thing · tend to = usually · membrane = a thin skin · semi-permeable membrane = a skin that lets only some things pass · solvent = the liquid (here, water) · solute = the thing in the liquid (here, salt) · concentration = how much of something is in a liquid · equalize = make equal · on either side of = on both sides of · practical = useful · pickling = making pickles · seasonings = things you add to food for taste · crunchy = hard, not soft · force = push · pressure = a strong push · particle = a very small piece

26. Which can best replace the underlined word remove? [2.5 pts]

① take out ② put in ③ cut up ④ look at ⑤ pay for

27. According to the passage, what is brine made of? [2.5 pts]

① water, sugar, and oil ② salt, sugar, and seasonings
③ salt, seasonings, and oil ④ water, salt, and seasonings
⑤ water, sugar, and pepper

28. Why does the writer talk about pickling? [2.5 pts]

① to teach how to grow fresh vegetables ② to explain how to make brine step by step
③ to show how we can drink seawater ④ to explain when molecules stop moving
⑤ to show how osmosis works in daily life

29. Which is **NOT** true according to the passage? [2.5 pts]

① Molecules are always moving.
② The skin of a vegetable acts as a semi-permeable membrane.
③ During pickling, water moves out of the vegetables.
④ Pickled vegetables become soft in the brine.
⑤ People can drink seawater after reverse osmosis.

30. Complete the summary of the passage. Which words best fit (A) and (B)? [2.5 pts]

Osmosis makes the concentration on both sides of a membrane (A) _____. Reverse osmosis needs (B) _____ to push molecules to the side with less salt.

① (A) higher …… (B) heat ② (A) the same …… (B) salt
③ (A) the same …… (B) pressure ④ (A) lower …… (B) heat
⑤ (A) higher …… (B) pressure

Unit 7 · Social Studies

[31–35] Read the passage and answer the questions.

People usually make tough decisions by voting for one of two or more options. The option that gets the most votes is the winner. This is called majority rule. However, even if only 51% of people in a group vote for an option, they will get their choice. That means, almost half of the people in that group will not get their choice. In that case, is majority rule really fair?

Most democracies elect public officials through a majority vote. In a system with two political parties, a slim margin, such as 51% to 49%, can decide an election. In a system with more than two parties, less than 50% of voters could give one political party a victory. To ensure the _____ of majority rule, certain conditions must be met. First, people should be able to vote with secret ballots. Second, each person's vote should be weighted equally. Finally, there have to be enough voters to make a majority vote truly fair.

When an election is won with less than 50% of the total votes, the winning party must consider the opinions of the other voters. This is because running a democracy should ensure equality for all citizens.

Words: tough decision = a hard choice · vote = choose by marking a paper · option = a choice · majority = more than half · democracy = a country where people vote for their leaders · elect = choose by voting · public official = a person who works for the government · political party = a group of people who try to win elections · slim margin = a very small difference · victory = a win · ensure = make sure · condition = something that must be true · be met = be followed · secret ballot = voting where no one sees your choice · be weighted equally = count the same · consider = think about · opinion = what a person thinks · citizen = a person of a country · equality = everyone being treated the same

31. According to the passage, which option wins under majority rule? [2.5 pts]

① the option chosen by the oldest person ② the option that everyone agrees on
③ the option that gets the most votes ④ the option that the president likes best
⑤ the option that gets the fewest votes

32. Which word best fits in the blank? [2.5 pts]

① victory ② speed ③ price ④ fairness ⑤ size

33. What is the passage mainly about? [2.5 pts]

① how a slim margin decides a two-party election
② the history of majority rule in democracies
③ majority rule and what it needs to work well
④ why every democracy needs secret ballots
⑤ the jobs of public officials in a democracy

34. Which is true according to the passage? [2.5 pts]

① Under majority rule, an option with only 51% of the votes does not win.
② Most democracies choose public officials without voting.
③ People do not need secret ballots for a fair vote.
④ With two parties, 51% to 49% is too small to decide an election.
⑤ With more than two parties, a party can win with under 50% of the votes.

35. Which idea would the writer most likely agree with? [2.5 pts]

① Majority rule works well even when only a few people vote.
② A decision made by majority rule may not be fair to everyone.
③ A winning party does not need to listen to the other voters.
④ In a fair vote, some people's votes may count more than others'.
⑤ A democracy does not need equality for all its citizens.

Unit 8 · Science

[36–40] Read the passage and answer the questions.

The invention of the telescope has helped humans see and understand the stars better. How have telescopes changed over time?

Telescopes were originally used to see long distances. Galileo was one of the first to use a telescope to observe the stars. His telescope used a concave eyepiece and a convex lens. This gave the image seen through the telescope an upright view and magnified it up to thirty times! Even though Galileo's telescope was quite useful at the time, the images it produced were blurry. Kepler improved on Galileo's design by using a convex eyepiece and lens. This gave a much wider field of view, even though the images appeared upside-down.

In modern times, telescopes have been launched into space to help astronomers observe not just the stars, but the universe as well. One example is the Hubble Telescope, which orbits Earth and sends back high-quality pictures of distant planets and galaxies. Through continued technological developments, humans can _____.

Words: invention = making something new for the first time · observe = watch carefully · concave = curved in · convex = curved out · eyepiece = the part you look into · upright = with the top at the top (not upside-down) · magnify = make bigger · blurry = not clear · field of view = how much you can see · upside-down = the top at the bottom · launch = send into space · orbit = go around · distant = far away · galaxy = a very large group of stars · continued = going on · technological development = new technology

36. According to the passage, how many times could Galileo's telescope magnify an image? [2.5 pts]

① three times ② five times ③ ten times ④ twenty times ⑤ thirty times

37. What does the underlined word astronomers mean? [2.5 pts]

① people who study the stars ② people who invent new things
③ people who fly airplanes ④ people who work on a farm
⑤ people who design buildings

38. Complete the table about the passage. Which words best fit (A) and (B)? [2.5 pts]

	Galileo's telescope	**Kepler's telescope**
eyepiece	(A) _____	convex
lens	convex	convex
images	upright, but blurry	wider view, but (B) _____

① (A) convex ..... (B) upside-down ② (A) concave ..... (B) blurry
③ (A) convex ..... (B) upright ④ (A) concave ..... (B) upside-down
⑤ (A) concave ..... (B) clear

39. What is the best title for the passage? [2.5 pts]

① How to Make Your Own Telescope ② The Development of Telescopes
③ The Weak Points of Galileo's Telescope ④ What the Hubble Telescope Does
⑤ Galileo and Kepler: Two Great Scientists

40. Which best fits in the blank? [2.5 pts]

① understand the universe much better ② travel to distant planets and galaxies
③ see the stars without any telescope ④ build telescopes faster and cheaper
⑤ send more people into space
