The Reading 7-1 Practice Questions

English Reading · Level 7 · Units 1–8

Class _____ Name _____

• 10 questions for each unit · 5 choices · Choose one answer for each question.

Unit 1 · Art

[1–10] Read the passage and answer the questions.

Throughout time, art has been used to decorate homes, churches, and public buildings. In modern times, art is used in advertisements, magazines, cartoons, and even on television! Art in advertisements has become increasingly popular. This is called commercial art. One of the most famous commercial artists was Andy Warhol.

Andy Warhol was often sick as a child, so he spent a lot of time drawing. After college, he began his career making art for advertisements. His drawings of shoes became so well known that people wanted to see more of his work. Thus, in the 1950s, he began showing his popular works in art galleries. Warhol was one of the first artists to use silkscreen ink printing in his work. During the 1960s, he produced many famous art pieces depicting everyday objects. These include Coca-Cola bottles, dollar bills, and Campbell's Soup cans. This kind of art is referred to as "pop art."

Some critics think Andy Warhol was only interested in making money with his art. Others thought he was the perfect example of commercialized modern life. Apart from this argument, most critics agree that Warhol's work shows the changing value of art in everyday life.

Words: increasingly = more and more · advertisement = a picture or words that tell people to buy something · silkscreen ink printing = a way of printing pictures · depict = show, draw · critic = a person who gives opinions about art · commercialized = made to make money · argument = a disagreement

1. What does the underlined word decorate mean?

① make something bigger ② make something clean
③ make something look nicer ④ make something cheaper
⑤ make something quiet

2. What does the underlined word career mean?

① the job a person does for a long time ② the house a person lives in
③ the school a person goes to ④ the family a person has
⑤ the games a person plays

3. According to the passage, when did Warhol begin showing his works in art galleries?

① in the 1920s ② in the 1930s ③ in the 1940s ④ in the 1950s ⑤ in the 1960s

4. According to the passage, Warhol was one of the first artists to use _____.

① oil paint ② silkscreen ink printing
③ photographs ④ computer pictures
⑤ colored pencils

5. What does the underlined word This refer to?

① art in churches ② art in public buildings
③ art on television ④ art in magazines
⑤ art in advertisements

6. What does the underlined word Others refer to?

① other artists ② other critics
③ other advertisements ④ other art galleries
⑤ other everyday objects

7. Which is the correct order of (A), (B), and (C), from first to last?

> (A) Many people wanted to see more of Warhol's work.
> (B) Warhol spent a lot of time drawing as a child.
> (C) Warhol got his first job making art for advertisements.

① (B) – (C) – (A) ② (A) – (B) – (C)
③ (A) – (C) – (B) ④ (B) – (A) – (C)
⑤ (C) – (A) – (B)

8. Which is **NOT** true according to the passage?

① Art has been used to decorate churches.
② Some critics think Warhol only wanted to make money with his art.
③ Warhol's drawings of shoes were not well known.
④ Warhol made art pieces of Campbell's Soup cans.
⑤ Most critics agree that Warhol's work shows the changing value of art.

9. What can we learn from the passage?

① Warhol made art only for television.
② Warhol's works were shown only in art galleries.
③ People in the past did not use art to decorate buildings.
④ Warhol stopped drawing after college.
⑤ Critics have different ideas about why Warhol made his art.

10. What can we learn from the passage?

① Pop art used pictures of things people saw every day.
② Pop art showed pictures of homes and churches.
③ Pop art showed mostly famous people.
④ Pop art was the first kind of art Warhol made.
⑤ Most critics think pop art was only about making money.

Unit 2 · Nature

[1–10] Read the passage and answer the questions.

The water cycle is necessary for life on Earth. Water on the ground evaporates into vapor and forms clouds in the sky. In return, rain brings water back down to the ground again, which ends up in streams, rivers, lakes, and oceans. What happens when humans tamper with the water cycle?

Most evaporation occurs in oceans as a result of the Sun's energy. This cools the temperature of Earth's climate and also affects the oceans' salt content. Having the correct amount of salt in the oceans maintains a delicate ecosystem of plants, fish, and other wildlife. One example of a disaster caused by tampering with the water cycle is the drying-up of the Aral Sea. The two rivers that fed the Aral Sea were diverted for farming in the desert. As a result, the sea is now almost completely dry, killing the wildlife that lived there and causing dust storms that affect human health.

As we can see, the water cycle is necessary to keep the environment balanced. It is important to understand the water cycle and to protect our water sources so they can function well for Earth's sake.

Words: evaporate = change into gas · evaporation = when water evaporates · vapor = water in the air · in return = then, the other way · end up = finally arrive · tamper with = change something in a bad way · climate = the usual weather of a place · temperature = how hot or cold something is · affect = change something · salt content = the amount of salt · delicate = easily hurt or broken · ecosystem = all the living things in a place · wildlife = wild animals and plants · disaster = a very bad event · fed = brought water to · divert = make a river go a different way · dust storm = a strong wind full of dust · function = work · for Earth's sake = for the good of Earth

1. Which can best replace the underlined word occurs?

① stops ② happens ③ falls ④ ends ⑤ hides

2. Which can best replace the underlined word necessary?

① dangerous ② strange ③ slow ④ expensive ⑤ needed

3. According to the passage, what causes most evaporation in the oceans?

① the wind ② the Moon ③ the salt ④ the Sun ⑤ the rain

4. According to the passage, where does rainwater end up?

① in the clouds ② in the desert
③ in rivers and oceans ④ in the sky
⑤ in the air as vapor

5. Why does the writer talk about dust storms?

① to explain how clouds are made
② to explain how the Sun warms the oceans
③ to describe the weather in the ocean
④ to show that the dry Aral Sea hurts people's health
⑤ to explain why the sea is salty

6. Why does the writer talk about the salt in the oceans?

① to show that sea life needs the right amount of salt
② to explain why seawater tastes bad to drink
③ to show how people make salt from the sea
④ to explain why fish die in rivers and lakes
⑤ to show how clouds get their water from the sea

7. Which is **NOT** true according to the passage?

① Water on the ground evaporates and forms clouds.
② Evaporation changes the amount of salt in the oceans.
③ There are plants, fish, and other wildlife in the oceans.
④ People can change the water cycle in a bad way.
⑤ Rain takes water from the ground up to the sky.

8. Which is true according to the passage?

① The Aral Sea dried up because there was too little rain.
② It is important to understand the water cycle.
③ Dust storms made the Aral Sea dry.
④ The two rivers still flow into the Aral Sea.
⑤ Clouds are made of salt.

9. Complete the summary of the passage. Which words best fit (A) and (B)?

The Aral Sea became dry. This (A) _____ the animals that lived there and (B) _____ dust storms.

① (A) helped …… (B) stopped ② (A) killed …… (B) stopped
③ (A) killed …… (B) caused ④ (A) helped …… (B) caused
⑤ (A) moved …… (B) caused

10. Complete the summary of the passage. Which words best fit (A) and (B)?

Evaporation keeps Earth from getting too (A) _____. The right amount of salt in the oceans helps the plants and fish in the sea (B) _____.

① (A) cold …… (B) live ② (A) hot …… (B) die
③ (A) cold …… (B) die ④ (A) hot …… (B) live
⑤ (A) dry …… (B) move

Unit 3 · Social Studies

[1–10] Read the passage and answer the questions.

In the 1980s, people who protested the increasing trend of fast food started a “slow food” movement. The movement aimed to preserve local foods, recipes, and communities, while (a) _____ fast, commercialized foods. This inspired the “slow city movement.”

The first Slow City was Chianti, Italy. The people there wanted to keep nature in good shape and protect historic buildings. They came up with a plan for developing their town just the way they wanted. They called this plan cittaslow. The term comes from the words “slow” and “citta,” which means “town” or “city” in Italian. The founders of this plan decided that new developments should keep people healthy and promote good relationships among neighbors. They also thought development should not (b) _____ the natural environment.

Since 1999, dozens of cities around the world have been named Slow Cities. They have a lot of green places where people can exercise and enjoy nature. Slow Cities do not have many fast-food restaurants or big supermarkets. Instead, they have locally owned restaurants and small markets. Try visiting a Slow City someday to see if you like it!

Words: protest = say no to something · trend = what many people do · preserve = keep · commercialized = made to make money · inspire = give an idea · historic = old and important · come up with = think of · term = a word · founder = a person who starts something · promote = help something grow · dozens of = many · exercise = move your body to stay healthy · locally owned = owned by people in the town

1. According to the passage, when did the slow food movement start?

① in the 1950s ② in the 1960s ③ in the 1970s ④ in the 1980s ⑤ in the 1990s

2. According to the passage, what does “citta” mean in Italian?

① slow ② town ③ food ④ nature ⑤ plan

3. Which word best fits in blank (a)?

① buying ② cooking ③ selling ④ eating ⑤ rejecting

4. Which word best fits in blank (b)?

① hurt ② help ③ make ④ see ⑤ build

5. What is paragraph 2 mainly about?

① the history of fast food in Italy ② the local foods of Chianti
③ the first Slow City and its plan ④ famous old buildings in Italy
⑤ how to visit a Slow City

6. What does the underlined word They refer to?

① people who love fast food
② the owners of big supermarkets
③ visitors to Italy
④ the people who started the slow food movement
⑤ the people of Chianti

7. Which is true according to the passage?

① Slow Cities have many big supermarkets.
② People in Slow Cities can exercise outdoors in nature.
③ The slow city movement started before the slow food movement.
④ People in Chianti wanted to build many new fast-food restaurants.
⑤ Two cities have been named Slow Cities since 1999.

8. Which is **NOT** true according to the passage?

① People in Chianti wanted to keep nature in good shape.
② Cittaslow was a plan for developing the town.
③ Slow Cities have locally owned restaurants.
④ New developments in Chianti did not need to keep people healthy.
⑤ The slow food movement wanted to keep local foods and recipes.

9. Which place would you most likely find in a Slow City?

① a small market owned by a family in the town ② a street with many fast-food restaurants
③ a very big supermarket ④ a factory that makes the river dirty
⑤ a new road built over a green park

10. What can we learn from the passage?

① Slow Cities have more fast-food restaurants than other cities.
② There are Slow Cities in many countries now.
③ People in Slow Cities cannot buy food in their own town.
④ Slow Cities have no plan for new developments.
⑤ Slow Cities do not care about nature.

Unit 4 · Science

[1–10] Read the passage and answer the questions.

Before modern chemistry, ancient people tried to understand the makeup of the world. The ancient Greek philosopher Empedocles theorized that four elements made up every substance known to man. These elements were water, fire, earth, and air.

What observations did Empedocles make about these elements? First, he noted that pots were made with earth and water. After being mixed and shaped, they were burned with fire and cooled with air. All four elements were necessary to (a) _____. The same pot was used for cooking plants from the earth, often mixed with water, over a flame. The air cooled down the food so it could be eaten. Thus, all four elements were necessary to prepare a meal. Empedocles also believed that these elements were indestructible and unchangeable. His theories inspired later scientists to study more about the elements that make up our world.

Think about your life and all of your belongings. How are the four elements involved in things you own, such as your computer, your clothes, and the food you eat? Thinking about everyday objects on a small scale can help us (b) _____.

Words: chemistry = the science of what things are made of · makeup = what something is made of · philosopher = a person who thinks about big questions · theorize / theory = an idea about how something works · element = a basic thing that makes up everything · substance = a thing, a material · known to man = that people know about · observation = what you see · note = see, notice · flame = fire · thus = so · necessary = needed · prepare = make ready · inspire = give someone new ideas · involved in = a part of · everyday objects = things we use every day · on a small scale = by looking at small things

1. According to the passage, who was Empedocles?

① an ancient Greek philosopher ② a Roman king
③ a modern chemist ④ a Chinese teacher
⑤ an Egyptian farmer

2. According to the passage, who did Empedocles's theories inspire?

① Roman kings ② young children
③ later scientists ④ farmers
⑤ cooks

3. What does the underlined word ancient mean?

① very new ② very old ③ very big ④ very small ⑤ very rich

4. What does the underlined word belongings mean?

① places that you visit ② people that you know
③ foods that you eat ④ games that you play
⑤ things that you own

5. Complete the table about the passage. Which words best fit (A) and (B)?

Element	Cooking with the Pot
earth	Plants come from it.
(A) _____	The plants are mixed with it.
(B) _____	The plants are cooked over it.
air	It cools down the food.

① (A) air ..... (B) earth ② (A) fire ..... (B) water
③ (A) earth ..... (B) air ④ (A) water ..... (B) fire
⑤ (A) water ..... (B) earth

6. Complete the summary of the passage. Which words best fit (A) and (B)?

Empedocles saw that making a pot needs all (A) _____ elements, and he believed that the elements could not be (B) _____.

① (A) two ..... (B) changed ② (A) four ..... (B) cooked
③ (A) four ..... (B) changed ④ (A) five ..... (B) seen
⑤ (A) two ..... (B) seen

7. What is paragraph 2 mainly about?

① how to make a strong pot at home
② why fire is dangerous when we cook
③ the four elements in making pots and meals
④ the long history of cooking in Greece
⑤ how people lived in ancient Greece

8. What is the last paragraph mainly about?

① the four elements in the things we own
② buying new computers and new clothes
③ cooking plants and food over a flame
④ the long life of the philosopher Empedocles
⑤ how to become a Greek philosopher

9. Which best fits in blank (a)?

① mix earth and water
② write a letter
③ catch a fish
④ buy a horse
⑤ make one pot

10. Which best fits in blank (b)?

① buy more things for our home
② cook better food every day
③ become a famous philosopher
④ understand the world around us
⑤ learn more about ancient Greece

Unit 5 · Art

[1–10] Read the passage and answer the questions.

How did the teddy bear get its name? It comes from U.S. president Theodore Roosevelt. During a hunting trip, Roosevelt refused to kill a bear that had been tied to a tree. All over America, people heard about this story. Some people even made stuffed bears and called them "teddy bears" in honor of the president's nickname, Teddy.

Teddy bears became mass-produced in the twentieth century. They were mainly toys for children, but they were also popularly featured in books and even in movies. Some well-known examples include Winnie the Pooh, which was originally written for adults, as well as Paddington Bear. Due to their popularity, teddy bears were manufactured in a wide range of sizes, colors, and materials. They have endured such lasting popularity that there are museums dedicated to teddy bears all around the world. England, Japan, and South Korea are just a few countries that have teddy bear museums.

Whether they are children's toys, subjects of books, or objects on display at museums, teddy bears remain popular. They bring children comfort and are fun to play with. Teddy bears will probably be around for a long time to come.

Words: refuse = say no · stuffed bear = a toy bear · in honor of = to show respect for · mass-produced = made in large numbers · be featured in = appear in · manufacture = make · endure = last a long time · dedicated to = made for · subject = what a book is about

1. What does the underlined word nickname mean?

① a long, official name ② a family name
③ the name of a place ④ the name of a toy
⑤ a short, friendly name

2. What does the underlined word comfort mean?

① a loud noise ② a lot of money
③ a bad dream ④ a good, calm feeling
⑤ a long trip

3. According to the passage, where did people hear about the story of Roosevelt and the bear?

① only in England ② in Japan and South Korea
③ all over America ④ in a teddy bear museum
⑤ in a movie

4. According to the passage, what was Roosevelt doing when he saw the bear?

① He was on a hunting trip. ② He was visiting a museum.
③ He was reading a book. ④ He was making a toy.
⑤ He was watching a movie.

5. What does the underlined word them refer to?

① the people who heard the story ② the toy bears that people made
③ the bears living in the forest ④ the hunters on the trip
⑤ the bear tied to the tree

6. What does the underlined word They refer to?

① children ② books and movies
③ museums ④ teddy bears
⑤ Winnie the Pooh and Paddington Bear

7. Which is the correct order of (A), (B), and (C), from first to last?

> (A) Many people heard the story about Roosevelt and the bear.
> (B) Roosevelt saw a bear that was tied to a tree.
> (C) The new toy bears got the name "teddy bears."

① (B) – (A) – (C) ② (A) – (B) – (C)
③ (A) – (C) – (B) ④ (B) – (C) – (A)
⑤ (C) – (A) – (B)

8. Which is **NOT** true according to the passage?

① Teddy bears were mainly toys for children.
② Winnie the Pooh was first written for adults.
③ Teddy bears have appeared in both books and movies.
④ Teddy bears bring children comfort.
⑤ Teddy bears were made in just one size and one color.

9. What can we learn from the passage?

① Teddy bears were popular only in the twentieth century.
② Teddy bears have been popular for a long time.
③ Teddy bears are now found only in museums.
④ Teddy bears were first made for movies.
⑤ The teddy bear got its name from a famous writer.

10. What can we learn from the passage?

① Teddy bears were more popular in books than as toys.
② Only American children play with teddy bears.
③ People in many countries love teddy bears.
④ Teddy bears are made only for adults.
⑤ Teddy bear museums are found only in England.

Unit 6 · Nature

[1–10] Read the passage and answer the questions.

Molecules are always moving. Sometimes, molecules even move through membranes. Molecules tend to pass through semi-permeable membranes to an area where the solvent concentration is higher. This equalizes the concentration of materials on either side of the membrane. This process is called osmosis. Osmosis is an important chemical process with practical uses in everyday life. What is one use of osmosis?

Fresh vegetables have a high concentration of water molecules. During pickling, vegetables are placed in a brine—a mixture of water, salt, and seasonings. The skin acts as a semi-permeable membrane. Water molecules move out of the vegetables through the skin and into the brine, which equalizes the solvent concentration on either side of the membrane. This process is an example of osmosis, and it is why pickled vegetables stay crunchy.

Reverse osmosis is a process that uses pressure to force molecules into an area of lower solute concentration. We use reverse osmosis to remove salt and other particles from seawater. Afterward, we can drink the water!

Chemical processes like osmosis have a big effect on our everyday lives. For this reason, learning about how they work is important for our understanding of the world.

Words: molecule = a very small part of a thing · tend to = usually · membrane = a thin skin · semi-permeable membrane = a skin that lets only some things pass · solvent = the liquid (here, water) · solute = the thing in the liquid (here, salt) · concentration = how much of something is in a liquid · equalize = make equal · on either side of = on both sides of · process = the way something happens, step by step · chemical = about how things mix and change · pickling = making pickles · seasonings = things you add to food for taste · crunchy = hard, not soft · reverse = the other way around · pressure = pressing hard on something · particle = a very small piece · effect = a change that something makes

1. Which can best replace the underlined word force?

   ① push ② pull ③ stop ④ cool ⑤ count

2. Which can best replace the underlined word practical?

   ① strange ② useful ③ dangerous ④ expensive ⑤ slow

3. According to the passage, what acts as a semi-permeable membrane during pickling?

   ① the salt ② the brine ③ the water ④ the seasonings ⑤ the skin

4. According to the passage, what do we use reverse osmosis for?

   ① to make pickles ② to grow vegetables
   ③ to cool down food ④ to make clean water from seawater
   ⑤ to warm up seawater

5. Why does the writer say that pickled vegetables stay crunchy?

   ① to explain how to make vegetables soft ② to show that salt makes food taste good
   ③ to show a result of osmosis in pickling ④ to explain why vegetables are healthy
   ⑤ to show that brine is dangerous

6. Why does the writer ask, “What is one use of osmosis?”

   ① to say that osmosis has no uses
   ② to ask the reader to do an experiment
   ③ to show that an example comes next
   ④ to explain what a molecule is
   ⑤ to show that the writer does not know the answer

7. Which is **NOT** true according to the passage?

   ① Molecules sometimes move through membranes.
   ② Water molecules can pass through the skin of a vegetable.
   ③ Pickles are made in a brine.
   ④ Fresh vegetables have very little water in them.
   ⑤ Learning about chemical processes helps us understand the world.

8. Which is true according to the passage?

   ① Vegetables are placed in fresh water during pickling.
   ② Chemical processes are important in our daily lives.
   ③ Reverse osmosis is used to make pickles.
   ④ Seasonings are not part of a brine.
   ⑤ Osmosis happens only in the sea.

9. Complete the summary of the passage. Which words best fit (A) and (B)?

In pickling, the vegetables have (A) _____ water than the brine, so water moves (B) _____ of them.

① (A) more ..... (B) out ② (A) less ..... (B) out
③ (A) more ..... (B) into ④ (A) less ..... (B) into
⑤ (A) no ..... (B) into

10. Complete the summary of the passage. Which words best fit (A) and (B)?

In osmosis, molecules move to the side where there is (A) _____ solvent. In reverse osmosis, molecules are made to go to the side with (B) _____ solute.

① (A) less ..... (B) more ② (A) more ..... (B) more
③ (A) less ..... (B) less ④ (A) no ..... (B) less
⑤ (A) more ..... (B) less

Unit 7 · Social Studies

[1–10] Read the passage and answer the questions.

People usually make tough decisions by voting for one of two or more options. The option that gets the most votes is the (a) _____. This is called majority rule. However, even if only 51% of people in a group vote for an option, they will get their choice. That means, almost half of the people in that group will not get their choice. In that case, is majority rule really fair?

Most democracies (b) _____ public officials through a majority vote. In a system with two political parties, a slim margin, such as 51% to 49%, can decide an election. In a system with more than two parties, less than 50% of voters could give one political party a victory. To ensure the fairness of majority rule, certain conditions must be met. First, people should be able to vote with secret ballots. Second, each person's vote should be weighted equally. Finally, there have to be enough voters to make a majority vote truly fair.

When an election is won with less than 50% of the total votes, the winning party must consider the opinions of the other voters. This is because running a democracy should ensure equality for all citizens.

Words: tough decision = a hard choice · vote = choose by marking a paper · option = a choice · majority = more than half · democracy = a country where people vote for their leaders · public official = a person who works for the government · political party = a group of people who try to win elections · slim margin = a very small difference · victory = a win · ensure = make sure · condition = something that must be true · be met = be followed · secret ballot = voting where no one sees your choice · be weighted equally = count the same · consider = think about · opinion = what a person thinks · citizen = a person of a country · equality = everyone being treated the same

1. According to the passage, how do people usually make tough decisions?

① by fighting ② by voting
③ by guessing ④ by asking a teacher
⑤ by playing a game

2. According to the passage, what can decide an election in a two-party system?

① only a margin of 90% to 10% ② the age of the voters
③ a slim margin, such as 51% to 49% ④ the number of parties
⑤ the weather on election day

3. Which word best fits in blank (a)?

① winner ② loser ③ voter ④ party ⑤ question

4. Which word best fits in blank (b)?

① forget ② pay ③ teach ④ follow ⑤ elect

5. What is paragraph 1 mainly about?

① how public officials are chosen ② the three conditions for a fair vote
③ why secret ballots are important ④ what majority rule is and a problem with it
⑤ how many parties a democracy needs

6. What does the underlined word they refer to?

① the 51% of people who voted for the option ② the people who did not vote
③ the two or more options ④ the public officials
⑤ the people who lost the vote

7. Which is true according to the passage?

① Every voter gets their choice under majority rule.
② A party always needs more than half of the votes to win.
③ Public officials are chosen by the oldest citizens.
④ Majority rule is used only for small, easy decisions.
⑤ Almost half of a group may not get their choice.

8. Which is **NOT** true according to the passage?

① Each person's vote should be weighted equally.
② In most democracies, public officials get their jobs through a majority vote.
③ A majority vote is fair even when very few people vote.
④ Running a democracy should ensure equality for all citizens.
⑤ Secret ballots are one condition for a fair majority vote.

9. Which vote follows all the conditions for a fair majority vote in the passage?

① Only the leader of the group votes.
② Everyone can see how each person votes.
③ Some people's votes count two times.
④ Many people vote in secret, and every vote counts the same.
⑤ Only three people vote for the whole city.

10. What can we learn from the passage?

① In a two-party system, a party can win with 30% of the votes.
② In a two-party system, the winner has more than half of the votes.
③ Elections in a democracy are never close.
④ In a two-party system, the party with 49% wins.
⑤ Public officials need no votes to win.

Unit 8 · Science

[1–10] Read the passage and answer the questions.

Throughout history, humans have looked at the stars as a map, as a guide, and for worship. The invention of the telescope has helped humans (a) _____. How have telescopes changed over time?

Telescopes were originally used to see long distances. Galileo was one of the first to use a telescope to observe the stars. His telescope used a concave eyepiece and a convex lens. This gave the image seen through the telescope an upright view and magnified it up to thirty times! Even though Galileo's telescope was quite useful at the time, the images it produced were blurry. Kepler improved on Galileo's design by using a convex eyepiece and lens. This gave a much wider field of view, even though the images appeared upside-down.

In modern times, telescopes have been launched into space to help astronomers observe (b) _____. One example is the Hubble Telescope, which orbits Earth and sends back high-quality pictures of distant planets and galaxies. Through continued technological developments, humans can understand the universe much better.

Words: worship = praying to a god · invention = making something new for the first time · observe = watch carefully · concave = curved in · convex = curved out · eyepiece = the part you look into · upright = with the top at the top (not upside-down) · magnify = make bigger · blurry = not clear · field of view = how much you can see · upside-down = the top at the bottom · launch = send into space · orbit = go around · distant = far away · galaxy = a very large group of stars · universe = everything in space · continued = going on · technological development = new technology

1. According to the passage, who was one of the first to use a telescope to observe the stars?

① Kepler ② Hubble ③ Newton ④ Galileo ⑤ Einstein

2. According to the passage, what does the Hubble Telescope send back?

① rocks from the Moon ② maps of the oceans
③ reports about Earth's weather ④ songs from the radio
⑤ pictures of planets and galaxies

3. What does the underlined word originally mean?

① at last ② at first ③ never ④ always ⑤ later

4. What does the underlined word improved mean?

① broke ② copied ③ made better ④ sold ⑤ forgot

5. Complete the table about the passage. Which words best fit (A) and (B)?

	What people did
Long ago	People used the stars as a (A) _____ and a guide.
With telescopes	People could see (B) _____.

① (A) map …… (B) long distances ② (A) map …… (B) small animals
③ (A) friend …… (B) long distances ④ (A) friend …… (B) the bottom of the sea
⑤ (A) clock …… (B) small animals

6. Complete the summary of the passage. Which words best fit (A) and (B)?

Galileo's telescope made the image (A) _____ and much bigger, but the image was (B) _____.

① (A) upside-down …… (B) blurry ② (A) upright …… (B) clear
③ (A) upside-down …… (B) clear ④ (A) upside-down …… (B) dark
